Proposal for

ORIENTJET®

C SERIES *Digital Inkjet Press*

Proposal for:-

M/s. VIP System

About Us

The Printer's House (TPH) Orient group is a diversified group of companies founded in 1946 that is an industry leader in the manufacturing and supply of a host of engineered products from India. A renowned and trusted name globally when it comes to quality manufacturing.

The Year was 1946. K.D. Kohli, a freedom fighter and newspaperman, started The Printers House (TPH) Orient group. Since then, TPH has carved a formidable reputation as a quality conscious technology driven manufacturer of a number of products. Tph's adherence to global standards has enabled to export its products to more than 60 countries worldwide.

All our products are produced at factories in a 20 acre campus in Delhi NCR. Tph takes pride in being a company of Indian origin, started by an enterprising freedom fighter turned Newspaperman Mr. K.D. Kohli. The TPH Orient group is now a diversified group of companies and a market leader in printing machinery, packaging machinery , printing consumables , engineering services for Defence and aerospace, and solar energy.

However, it is in our humble origins we take solace and hope to continue to grow whilst supplying a product that can match any global standard.

77
years of
excellence

ORIENTJET©

With the dawn of a new age comes the implementation of new ideas. Keeping this in mind the TPH orient group of companies has continued to innovate and venture forward to once again redefine the way we print.

As one of the global pioneers of printing technology we have been able to combine our knowledge with that of industry leaders around the world to come out with a range of state of the art Inkjet presses. This range of presses , namely , the Orient Jet series will include presses suitable for printing in a multitude of sectors such as the commercial, book, newspaper, label, and packaging sectors.

•Our unique ability and experience in manufacturing market leading mechanical printing equipment along with our continuous acquisition of knowledge has allowed us to create a range of presses with world class quality and flexibility with perhaps the quickest ROI of any high quality inkjet press currently available. We at Orient are proud to present you with the Orient Jet series.

Technical Support

Our servicing team located across India provides excellent customer support for all technical requirements. Our service team will provide prompt site visit, 24/7 remote assistance and a support system just on a call.

Our patrons and their satisfaction is utmost important to us.

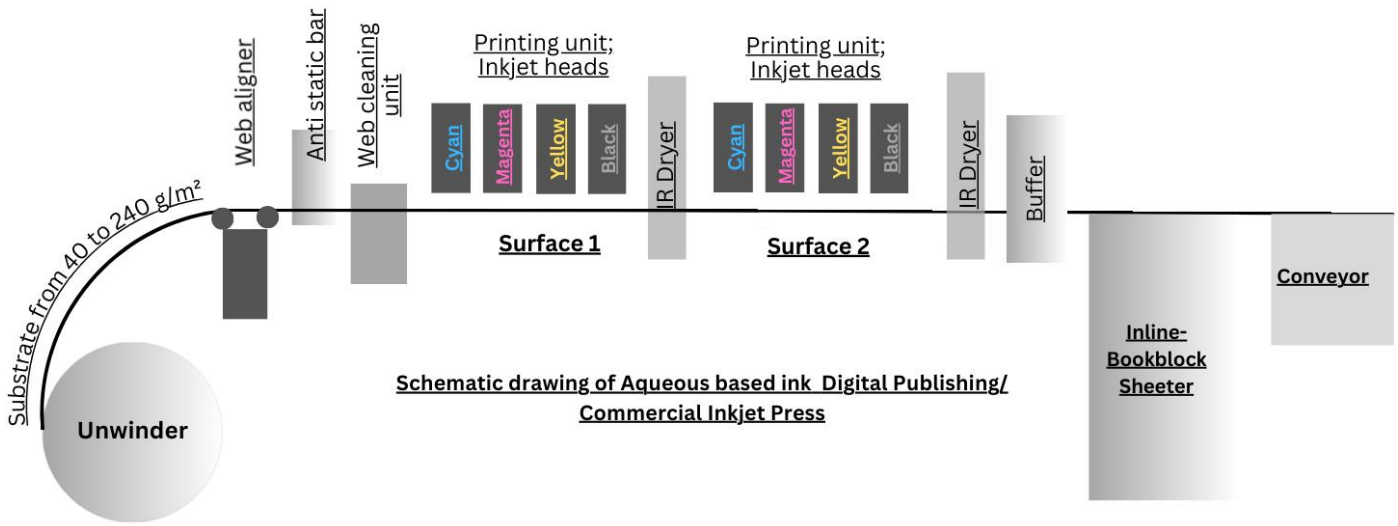
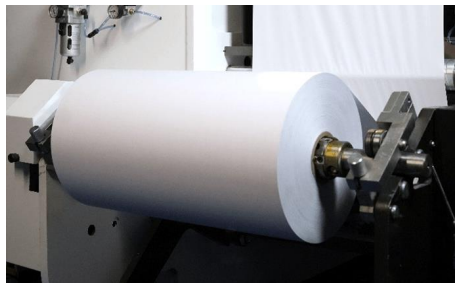
ORIENTJET C-Series



Press is designed with stress-relieved and machined side frames connected by a cross beam for proper alignment and rigidity to keep the machine vibration-free, and with the latest servo-based automation for the flawless operation of machinery.

Overview of Press Configurations :-

1. Unwind Station (Servo Driven)



- Auto Web-tension control system by program-based calculation for precise Web-tension control for the substrate throughout the process.
- Web-Tension control is based on diameter calculations and feedback from the load cell.
- Web-Tension range: 20-300N
- Pneumatic roll lifter for loading the substrate.
- Reel locking by cantilever 3" air expanding shafts.
- It is an active unwinder driven by a synchronous servo motor to keep proper Web-tension for any kind of substrate web handling.

2. Web Guide and Splice Table:

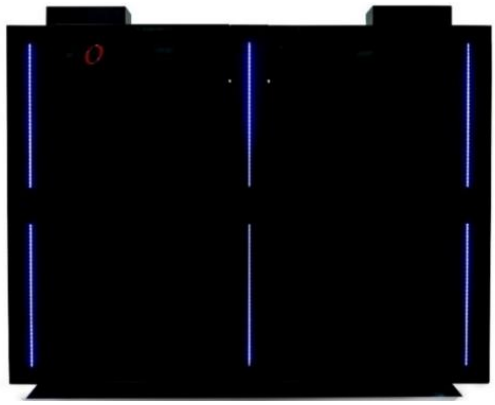
- Edge positioning type with twin roll aligner and actuator
- Ultrasonic type sensor
- Auto and manual correction displacement ±14mm
- Manual positioning of the sensor

3. Web Cleaner

- Web cleaning on both side with cleaning roll and active static bar discharger
- Remove the lint/ dust from the surface of the substrate before it enters the printing unit.
- Prevents ink from contamination

4. In-feed

- nip and pressure roller assembly with pneumatic cylinders at both end
- Isolates the Web-tension between unwinder and first station
- Web-Tension is maintained in closed loop by load cells mounted on both sides of the roller.
- Web-Tension range 20-300N



5. Printing Station

- Kyocera Print Heads.
- IR dryer
- Auto head cleaning arrangement

6. Post coating Flexo Unit

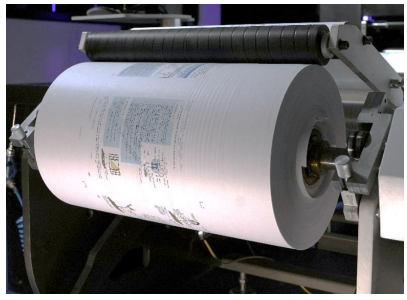
- The post-print flexo unit in a water-based inkjet press applies a protective coating or varnish after printing.
- This coating enhances durability, providing added resistance to scratches, moisture, and UV exposure.
- It can also improve the visual appearance of the print, adding gloss or matte finishes as required.
- The post-print flexo unit enables customized finishing options to meet diverse application needs.
- This final layer ensures the printed product maintains quality and appearance during handling, storage, and usage.

7. Outfeed

- nip and pressure roller assembly with pneumatic cylinders at both ends.
- provides separate and independent Web-tension zone between last printing and rewind unit
- Web-Tension is maintained in closed loop by load cells mounted on both sides of the roller.
- Web-Tension range 20-350N

8. Rewind Station

- Auto tension by program calculation
- Tension range: 20-350N
- Pneumatic roll lifter
- 3" air expanding cantilever shaft reel locking
- Active servo rewinder



9. External RIP with Server

- RIP with Imposition and VDP capability
- Print Server
- Optional Extra Print Server if the data is extra large
  With more than 1 million numbers and bar codes
- Workflow with Print Server

10. Orient-440 Book-block Sheeter

- Max paper width: 440mm
- Cutting method: Fixed-length & label recognition
- Max speed: 150 m/min (varies by paper type)
- Material: Paper: 40 to 240 g/m²
- Cutting length: 150-660mm
- Accuracy: ±0.2mm
- Correction: Process correction
- Blade: Pneumatic clutch (440 units/set, 660 units/pair)
- Collection: Swing-type pallet stacking
- One-touch switching mode
- Blade: Helical with flying shear
- Waste disposal: Pneumatic discharge door
- Stack replacement speed: 100 m/min, no deceleration
- Air source: 0.5Mpa, 0.1M3/h
- Power supply: 380V 50Hz 5Kw
- Environment: 25±5°C, 60%±5% humidity
- Dimensions: 4560 * 1600 * 2000 mm
- Connection: Bus communication mode for digital printing

Machine Specification

4 Col, Duplex printing unit 432 mm (Print width)

- **PRINT HEAD: (Kyocera)**
  4 Print Heads X 4 Col X 2 Arrays
  Printing Speed up to @ native 600 X 600 dpi 100 mtr/min;
  Printing Speed up to @ native 600 X 300 dpi 150 mtr/min;
  (Printing speed as per specification provided by Kyocera)

- **WEB TRANSPORT**
  Web Guide
  Web Cleaner
  Antistatic
  Media support: Coated & Uncoated Paper 40 to 240 g/m²*
  IR dryer for duplex

- **UNWINDER & REINDER**
  OD : 1000mm
  Auto lift

- **INK DELIVERY SYSTEM**
  Orientjet Multi Level IDS
  Aqueous based ink

- **RIP + Server**
  RIP with VDP capability
  HP/ Dell Server
  (Limited capacity for data handling)
  *Conditions Applied

- **Inline customized finishing as per customers' specifications.**

Equipment Pricing

4Col Duplex 432mm Printing Unit with Coating Unit with In-line Buffer + Book block Sheeter + Conveyer	**$ 5,95,000.00**
Ink Price :-	
per ltr for Black	**$ 32.00**
per ltr for Cyan, Magenta, Yellow	**$ 36.00**

General Terms and Conditions are applicable as published on www.tphorient.com website on the following link https://tphorient.com/assets/pdf/domestic.pdf for any orders in India and on the following link https://tphorient.com/assets/pdf/International.pdf for any orders outside of India.

THANK YOU
